Project Initialization and Planning Phase

Date	23 september2026
Team ID	SWTID-2026-9113
Project Title	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

,

Project Overview	
Objective	The primary objective is to import spreadsheet data into ServiceNow using Transform Maps and ensure accurate field mapping and record creation.
Scope	The project covers importing data from a spreadsheet into a ServiceNow table using Import Sets and Transform Maps. It includes data mapping, transformation, validation, and record creation
Problem Statement	
Description	Manual data entry from spreadsheets into ServiceNow can be time-consuming and may result in data entry errors. An automated import process is required to transfer spreadsheet data accurately into ServiceNow tables.
Impact	The proposed solution reduces manual data entry, minimizes errors, saves time, and improves the accuracy and efficiency of data management in ServiceNow.
Proposed Solution	
Approach	The project uses ServiceNow Import Sets and Transform Maps to import data from a spreadsheet. The spreadsheet data is uploaded, mapped to the appropriate ServiceNow table fields, transformed when required, and imported as ServiceNow records.
Key Features	Implementation of a machine learning-based credit assessment model. Put: • Import data from spreadsheet into ServiceNow. • Create and configure Transform Maps. • Map spreadsheet columns with ServiceNow table fields.

	- Real-time decision-making for quicker loan approvals. - Continuous learning to adapt to evolving financial landscapes.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Computer/Laptop for ServiceNow development	Basic computer/laptop
Memory	RAM required for browser and development	4 GB or above
Storage	Storage for spreadsheet and project files	10 GB or above
Software		
Resource Type	**Description**	**Specification/Allocation**
Platform	Cloud-based development platform	ServiceNow
Browser	Web browser for accessing ServiceNow	Google Chrome / Microsoft Edge

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Computer/Laptop for ServiceNow development	Basic computer/laptop
Memory	RAM required for browser and development	4 GB or above
Storage	Storage for spreadsheet and project files	10 GB or above
Software		
Resource Type	**Description**	**Specification/Allocation**
Platform	Cloud-based development platform	ServiceNow
Spreadsheet	Source data file	Microsoft Excel / CSV
Development Environment	ServiceNow development environment	ServiceNow Instance
Data	**Source, size, format**	**Kaggle dataset, 614, csv UCI dataset, 690, csv**

Resource Type	Description	Specification/Allocation
Data	Source data for import	ServiceNow target table
Target Table	Table where imported records are stored	ServiceNow Transform Map
