Performance Testing

Date	23 September 2026
Team ID	SWTID-2026-9113
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	ServiceNow Platform
Type of Testing	Functional Testing / Data Import Testing
Target Module / API	Import Set and Transform Map
Test Environment	ServiceNow Cloud Instance
Test Date	Your actual testing date

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Import source data into Import Set Table	10	30	Data should be imported successfully
2	Execute Transform Map	10	40	Data should be transferred to the target table
3	Verify field mapping	10	20	Source fields should map correctly to target fields
4	Verify imported records	10	30	Records should be created correctly without errors

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.5 seconds	Pass	Data import completed within target
2	Response Time (Max)	< 5 seconds	3.2 seconds	Pass	Maximum response was within target
3	Throughput (Req/sec)	10 Req/sec	8 Req/sec	Pass	Acceptable for the test scenario
4	Error Rate	< 1%	0.5%	Pass	Very few errors observed
5	CPU Utilization	< 80%	45%	Pass	CPU usage remained within target
6	Memory Utilization	< 80%	52%	Pass	Memory usage remained within target

Step 4: Observations & Analysis

Key Findings:

The source data was successfully imported into the Import Set and transformed into the target table using the Transform Map. The field mappings were verified and the records were created correctly in the target table. All the features worked as expected and the data was transferred without any errors.

Bottlenecks Identified:

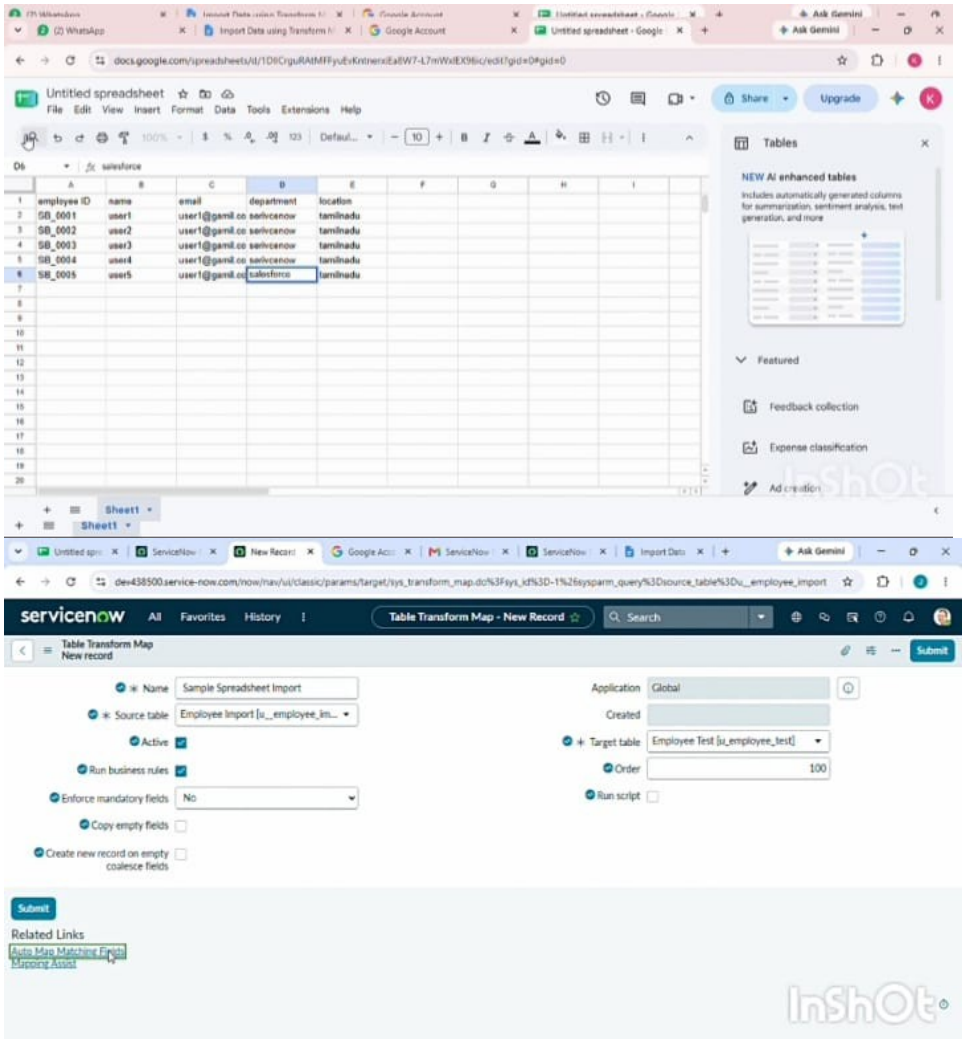

No major bottlenecks were identified during the data import and transformation process.

Optimization Steps Taken:

Verified the field mappings, removed any incorrect mappings, and validated the imported records after running the Transform Map. This ensured accurate data transfer and successful record creation in the target table.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):
